

S18 3×3 acquisition · raw

S18 3×3 acquisition · matched

Matched full TRAIN128 totals (original/context/10-pass): 14/128, 10/128, 1/128. Calibration overlap makes these optimistic in-sample fit measures. Low complete counts coexist with strong but imperfect relation ranking; they do not imply no learned information. One lineage, no confirmation or automatic extension.
