

A09 graph-record learning · development

A08 corruption · condition 0

A08 corruption · condition 1

A09: one development seed; final-population crosses are unconnected to curve events. Group 0 = 32 nodes / depth 4; group 1 = 64 / 8.

A08: three seed traces per arm; solid = original target, dashed = supplied target. Conditions: 64 nodes / depth 8 and 128 / 32.
