

S18 3×3 acquisition · raw

S18 3×3 acquisition · matched

Matched full TRAIN128 totals (original/context/10-pass): 14/128, 10/128, 1/128. Calibration overlap makes these optimistic in-sample fit measures.

Shared S11 parent, 57,853,781 parameters and incremental stream; arithmetic/runtime differ. Reused original training.

Low complete counts coexist with strong but imperfect relation ranking. One lineage; no confirmation or automatic extension.
